

Dokumentacja projektu BookShelfWebApp z przedmiotu Programowanie w .NET

Web aplikacja BookShelfWebApp jest prostym systemem do monitorowania przeczytanych lub posiadanych książek. Użytkownik może robić następujące działania ze swoimi książkami:

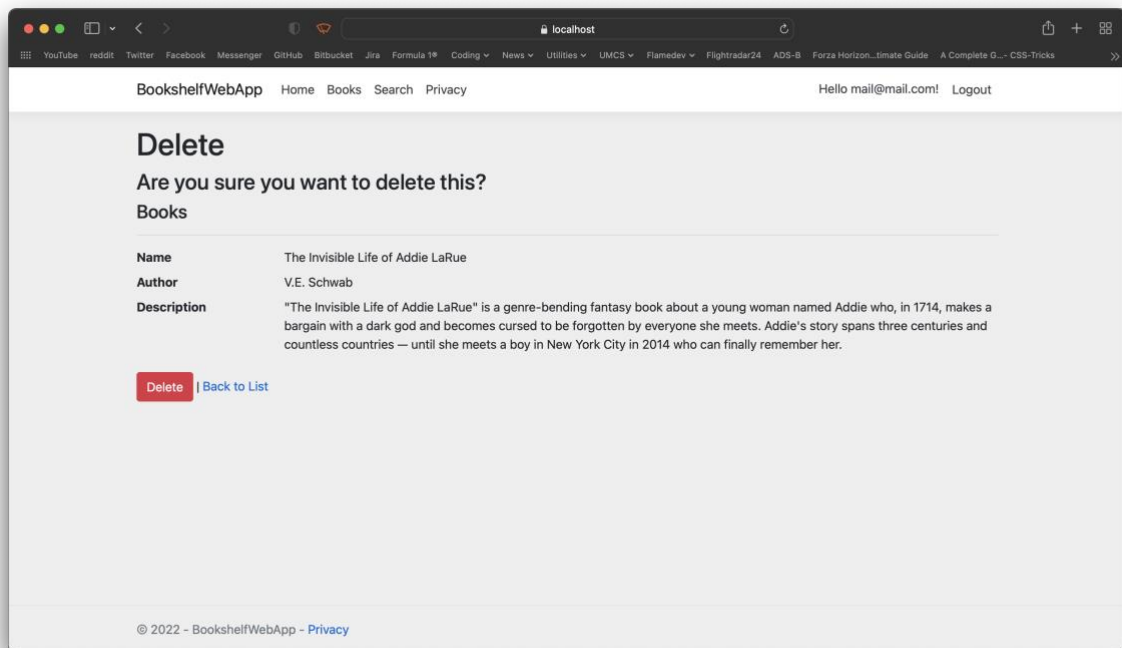

- Dodawać:

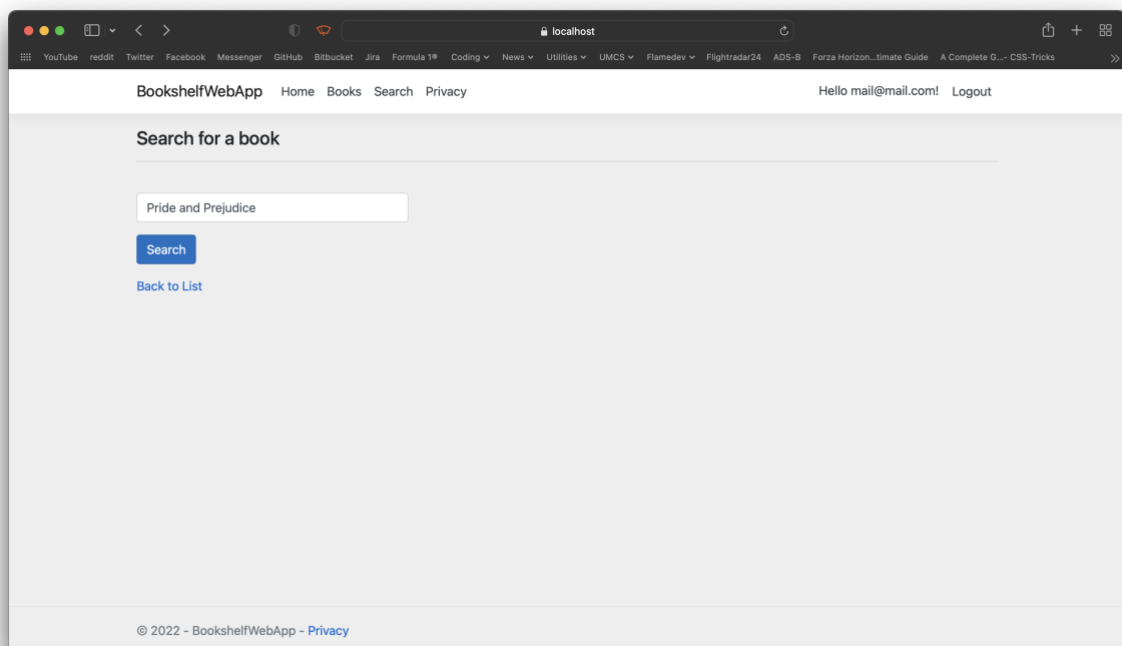

- Edytować:

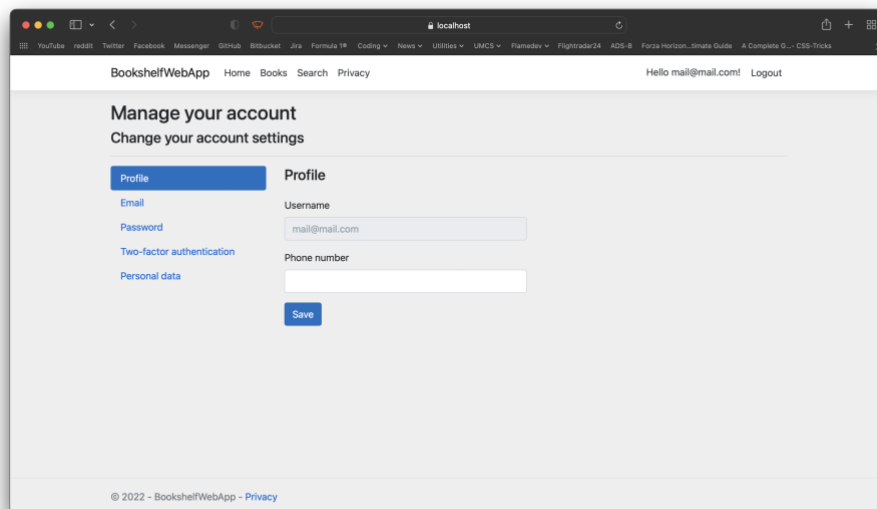

- Usuwać:

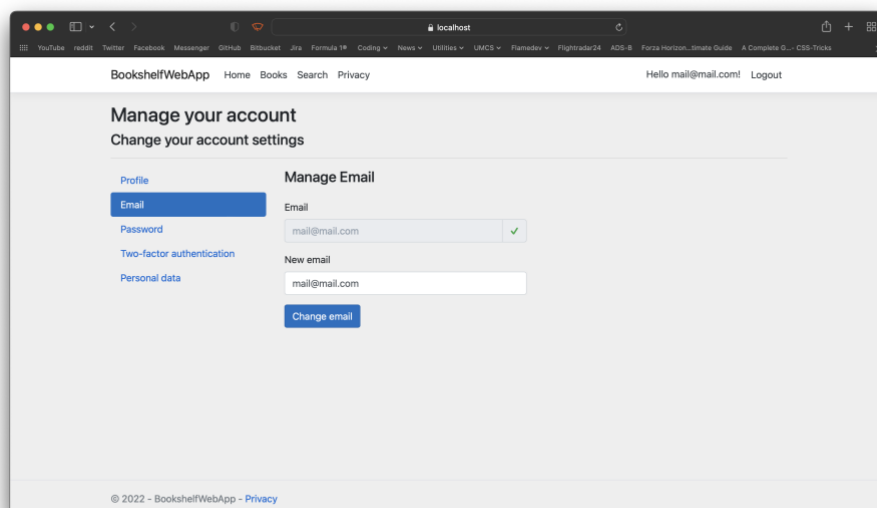

Także jest możliwość wyszukiwania książek:

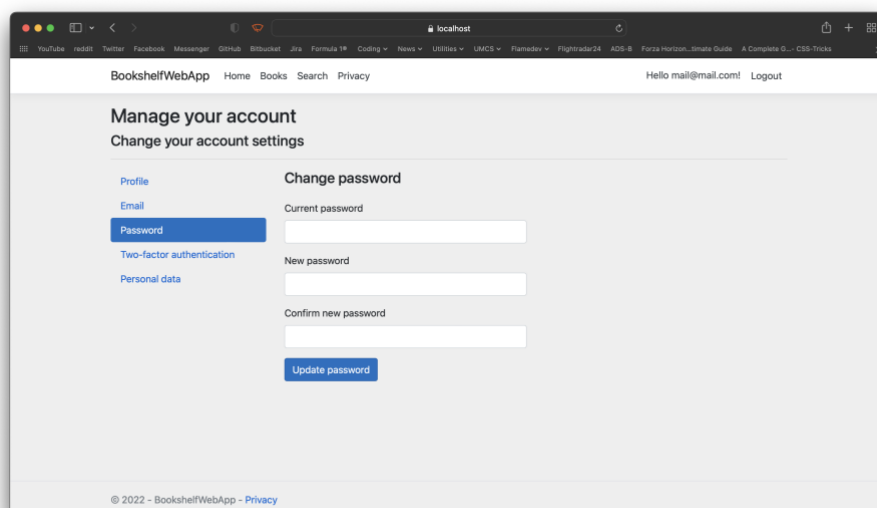

W aplikacji też istnieje możliwość rejestracji użytkowników wraz z edycją profilu użytkownika:

The screenshot shows a web browser window displaying the 'Manage your account' page of 'BookshelfWebApp'. The page has a navigation bar with links to Home, Books, Search, and Privacy. The user is logged in as 'Hello mail@mail.com!'. The 'Manage your account' section is active, and the 'Profile' tab is selected. The 'Profile' form includes fields for 'Username' (pre-filled with 'mail@mail.com') and 'Phone number'. A 'Save' button is at the bottom of the form. The footer shows '© 2022 - BookshelfWebApp - Privacy'.

The screenshot shows the 'Manage your account' page with the 'Email' tab selected. The 'Manage Email' section includes a form with two fields: 'Email' (pre-filled with 'mail@mail.com' and marked with a green checkmark) and 'New email' (pre-filled with 'mail@mail.com'). A 'Change email' button is at the bottom of the form. The footer shows '© 2022 - BookshelfWebApp - Privacy'.

The screenshot shows the 'Manage your account' page with the 'Password' tab selected. The 'Change password' section includes a form with three fields: 'Current password', 'New password', and 'Confirm new password'. An 'Update password' button is at the bottom of the form. The footer shows '© 2022 - BookshelfWebApp - Privacy'.
